

Innovative and Creative Designs from the Students of the School of Design & Environment

Year 1 students from the Diploma in Product Design & Innovation, School of Design & Environment, Ngee Ann Polytechnic, crafted some interesting and innovative leather and products and packaging.

The featured leather work was a collaborative effort between Semicolon Works and Ngee Ann Polytechnic to design and develop a range of commercially viable products using upcycled leather from Italy.

Whereas the creative packaging designs aim to provide solutions and improve user experience while using only sustainable materials.
